

## ***H125-IC-2.0 Series***

The  provides a **chemical free option for iron, sulfur odor, and black manganese removal.**

### ***Ecologically friendly –***

- The IC System is a “Green Technology”

### ***No Harmful Chemicals***

- Results in low-cost operation
- No damage to plants and animals
- No hazardous chemicals in the home

### ***Produces highly oxygenated water***

- Free from odor
- Free from problem causing rust
- Eliminates black staining

### ***Patented technologies***

- Sixteen years of proven reliability
- Recently updated patents and features improve efficiency

### ***Higher water flow rates than competing systems***

- High-flow control valve
- Reduced pressure loss in the home
- Custom designs for larger homes

### ***Double tank systems***

- Provides better iron and odor removal
- More efficient than simple single tank configuration

### ***Self-diagnostic software controls***

- Informs the homeowner about system operation;
  - Flow rates
  - Operation sequence
  - Time and maintenance schedule
  - Service provider’s phone number

***At Hellenbrand,  
we treat water naturally  
just like nature intended.***

***Naturally Tasteful...  
Tastefully Natural®***

# ***Iron Free Water***

# Only the Best Water Gets Past the Iron Curtain™.

## Benefits of the H125 Iron Curtain™ Filter System

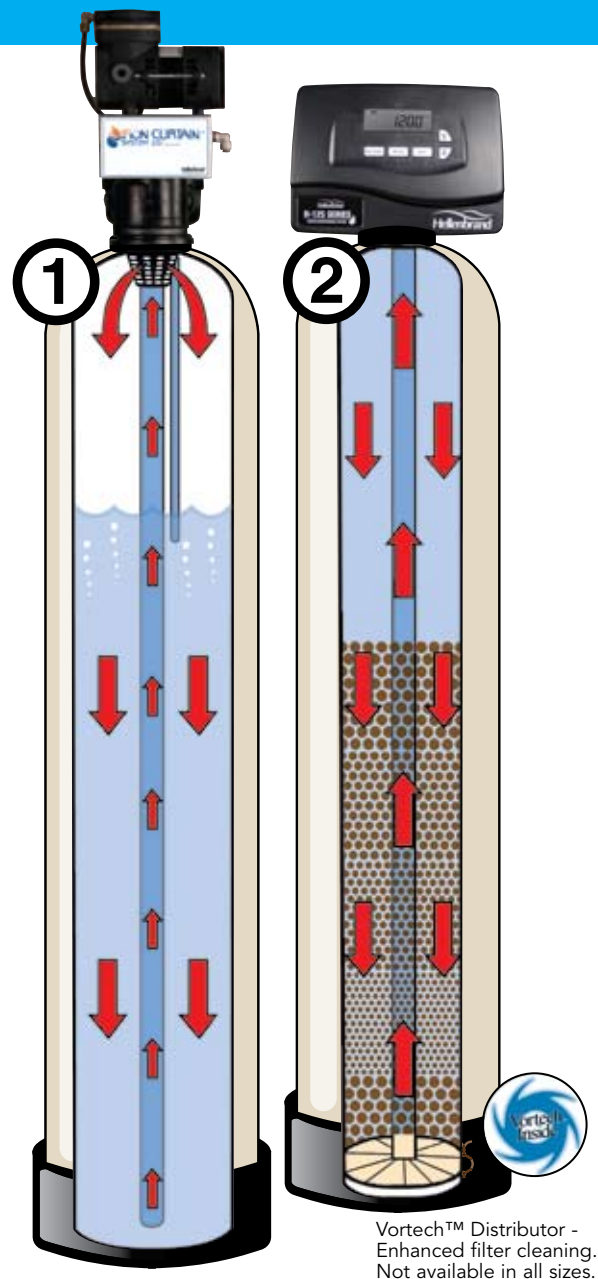

- Saves time and money cleaning rust stains in the bathroom, kitchen and laundry.
- Clothing will be brighter, whiter and last longer.
- Decreases salt consumption for your water softener.
- Water using appliances and fixtures last longer and stay cleaner.
- Lengthens the life of your water softener and drinking water systems.

## NEW! IC-2.0 Technology Upgrade

The new IC-2.0 technology marks the latest major upgrade to the original and proven 1992 patented Iron Curtain System. Called the most reliable and best iron and sulfur (rotten egg odor) system design by leading water treatment professionals in the industry.

## Why The Iron Curtain Filter System is Better Than Our Competitors:

- The Iron Curtain Filter System has been independently tested by the Water Quality Association and passed their rigorous S-200 filter standards. Many competitors' products have not!
- A properly sized Iron Curtain filter system regenerates with no harmful chemicals every three days. Many of our competitors systems need to regenerate daily. The Iron Curtain filter system saves you water! These savings could be as much as 2,000 gallons per month!
- The multi-media depth filter in the Iron Curtain filter system is proven by independent testing to be more effective on iron filtration and H<sub>2</sub>S (rotten egg odor) than the single media our competitors use.
- The Iron Curtain filter system is available in single, twin, triplex and four-plex filter configurations covering a wide range of flow rate applications from 5 gpm (gallons per minute) to over 800 gpm. There is a Hellenbrand Iron Curtain filter system for virtually any residential, commercial or industrial application.

## How does an Iron Curtain™ Work?

1. Water is forced through an aeration tank ① which converts dissolved minerals such as iron, manganese and sulfur into physical particles.
2. These tiny particles then circulate in the system for enough time to grow to a size where they are trapped in the filter tank. ② This way, the highest level of dissolved particles can be easily removed from your water.
