

Sanitizer Series[®] Conditioners

The Self-Sanitizing System with Proven Performance

A Single System Used to Effectively Treat Water in a Single Pass

- Removes hardness
- Removes iron
- Removes manganese
- Raises low pH levels
- Reduces iron and sulfur bacteria
- Reduces unpleasant tastes and odors

The Sanitizer Series[®] is the original multi-purpose system that softens water and automatically disinfects itself. Using a unique crystalline media, Sanitizer conditioners effectively remove hardness, iron and manganese while raising low pH level — all in a single pass. The patented chlorine generator safely sanitizes the entire media bed to remove nuisance bacteria and related odors.

- Exclusive Crystal-Right[™] media to remove hardness, iron and manganese, correct pH and control odor
- Patented self-chlorinator technology for bacteria control
- Single-unit operation — no chemicals or added equipment
- Choice of three regeneration options
- System analyzers communicate status at a glance
- User-friendly design makes system easy to operate and maintain

Sanitizer Series® Conditioners

The Self-Sanitizing System with Proven Performance

Sanitizer Series® with available electronic (XT) meter.

It's the Media ...

At the heart of Sanitizer's performance is the Crystal-Right® media, a crystalline media exclusive to Water-Right, Inc. In a single pass, this unique media does more to remove hardness, iron and manganese while raising low pH levels, than any other media available today.

It's the Control Valve ...

A solid state system analyzer uses color LED lights to indicate system status at a glance.

Green Light — system is producing clean, soft water

Red Light — system is in regeneration and/or sanitizing cycle

Yellow Light — indicates salt is low or sanitizing process is incomplete

Your dealer can also custom program regeneration cycles to fit your water consumption needs. Choose from three options that will help minimize both salt and water consumption.

- 1) time clock
- 2) electronic (SE) meter
- 3) electronic (XT) meter

It's the Company ...

Since 1963, Water-Right, Inc., a family-owned company, prides itself on providing both professional and personal service. Today, the Water-Right brand is found around the globe as we continue to provide "the right water for life."

Protect Your Household

Water-Right's Sanitizer Series® water conditioners have a proven history of treating problem water. As Water-Right's first self-chlorinating water conditioner, they remain one of the most innovative and effective systems in the market today. The Sanitizer is unmatched in removing hardness, iron and manganese while raising low pH levels — all in a single

pass. All of this helps ensure protection of your household plumbing from staining, scale and mineral deposits, while providing the benefits of softened water.

When armed with the right tools — media, control valve, chlorine generator and the Water-Right company itself — no other water treatment solution can compare in features or performance. Protect your home and your family with the best.

It's the Chlorine Generator ...

The Sanitizer uses a patented chlorine generator technology which produces chlorine to kill and remove unwanted iron and sulfur bacteria — the same nuisance bacteria that produces foul smells and the "slime coating" inside plumbing fixtures and toilet tanks.
